

TOEFL[®] test success starts here.

Introducing the new
TOEFL iBT[®] Online Prep Course.

The new
**TOEFL iBT[®] Online
Prep Course** creates a

Personalized Learning Path with up to 80 hours of content to help students do their best on the *TOEFL*[®] test — so they can get from where they are to where they want to be.

Diagnostic tests

identify the skills a student needs to improve, and create a Personalized Learning Path.

Robust exercises

help students build their skills in all four areas: reading, listening, speaking and writing.

Interactive vocabulary

engages students in the learning process.

Test-taking strategies

help students overcome test-taking obstacles.

Self-assessments

help students gauge their progress.

A grade book

tracks test results, spoken responses and self-assessments.

Management tools

allow schools to create and manage instructor-led classes.

Engaging exercises boost skills in all four areas measured by the **TOEFL**[®] test.

Reading

Students read academic passages of varying difficulty and answer questions about the information presented.

Listening

Students listen to lectures and conversations in academic settings and answer questions based on what they heard.

Speaking

Students speak their answers to prompts. The answers are measured by state-of-the-art speech recognition technology that pinpoints errors in sounds, grammar, rhythm, pitch and fluency of the student's speech.

Writing

Students practice taking notes and writing essays using both independent and integrated writing skills. Students also practice identifying and correcting common grammatical and mechanical errors.

Package options are available to suit every program.
